

ESC Congress 2012 - Munich - Press Releases - 27 August

Hot Line II: Late Breaking Trials on Interventions - Risk in cardiometabolic diseases: new findings - Renal denervation in severe hypertension

Please find below press releases from today's ESC Congress 2012 Press Conferences.

Hot Line II: Late Breaking Trials on Interventions: EMBARGO: Monday 27 August 2012 08:00 CEST

The following pages will be available from Monday 27 August 2012 08:00 CEST

Decrease in early mortality in STEMI attributed to changing patient profile and behaviour, and improved organisation of care: Data from four French registries over 15 years.

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/HL2-FAST-MI.aspx>

Intraaortic balloon pump fails to improve mortality rate in cardiogenic shock patients: the IABP-SHOCK II study

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/HL2-IABP-SHOCK-II.aspx>

Low and comparable rates of stent thrombosis found with zotarolimus- and sirolimus-eluting stents: the PROTECT study

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/HL2-PROTECT.aspx>

German aortic valve registry (GARY) aims to determine which valve disease treatment - TAVI or conventional valve replacement - is best for which patient

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/HL2-ASTRID.aspx>

Effect of MitraClip therapy on mitral regurgitation: clinical and functional improvement for majority of patients at one-year in prospective observational study

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/HL2-ACCESS-EU.aspx>

The effect of insulin glargine and fish oil supplements on atherosclerosis progression in high-risk patients with type 2 diabetes or pre-diabetes: the ORIGIN-GRACE study

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/HL2-GRACE.aspx>

Risk in cardiometabolic diseases: new findings - EMBARGO: Monday 27 August 2012 10:10 CEST

The following pages will be available from Monday 27 August 2012 10:10 CEST

Healthy lifestyle reduces the risk of hypertension by two thirds

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/healthy-lifestyle-reduces-risk-hypertension.aspx>

Energy drinks improve heart function

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/energy-drinks-improve-heart-function.aspx>

Psoriasis patients at high risk of diabetes

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/psoriasis-risk-diabetes.aspx>

Normal weight individuals with belly fat at highest CVD risk

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/weight-obesity-cardiovascular-mortality-risk.aspx>

Renal denervation in severe hypertension - EMBARGO: Monday 27 August 12:40 CEST

The following pages will be available from Monday 27 August 2012 12:40 CEST

Renal denervation gives better outcomes than drugs in advanced heart failure

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/effects-renal-denervation-heart-failure.aspx>

Renal denervation treats resistant hypertension in real world patient populations

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/renal-denervation-resistant-hypertension.aspx>

Renal denervation improves blood pressure and arterial stiffness

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/renal-denervation-improves-blood-pressure-arterial-stiffness.aspx>

Renal denervation achieves significant and sustained blood pressure reduction - **embargo 26 Aug**

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/renal-denervation-achieves-significant-blood-pressure-reduction.aspx>

Renal sympathetic denervation improves physical and mental health in resistant hypertension -

embargo 26 Aug

<http://www.escardio.org/about/press/press-releases/esc12-munich/Pages/anxiety-depression-quality-life-stress-resistant-hypertension-renal-sympathetic-denervation.aspx>
